

Turtle Beach Ear Force P11 Ear Cushion Replacement

The ear cushions are most likely to be torn apart due to rough use and need to be replaced from time to time.

Written By: Bhavesh Gandhi

INTRODUCTION

The ear cushions or the ear muffs accommodate the ears and create conducive pathway for sound from the speakers to reach to the ear. They are peripheral to the actual headset and also the most exposed component. Hence they are easily torn by rough handling making it inconvenient to use the device. They also need to be disassembled when integral components such as speakers need repair.

Step 1 — Ear Cushion

- Pinch the inner edge of the ear cushion from the bottom.

Step 2

- Now slowly pull down the ear cushion as it completely separates from the speaker.
- ⓘ Carry out the pulling down action as slowly as possible or you might risk tearing the ear cushion otherwise

To reassemble your device, follow these instructions in reverse order.
